CORE EXPERTISE

AI Research Engineer specializing in large language models and production-oriented conversational AI, with experience in retrieval-augmented generation, structured query planning, multi-hop question answering, and responsible NLP. Focused on building grounded, reliable agentic systems for search and commerce.

WORK EXPERIENCE

AI Research Engineer

NAVER Search

Dec. 2022 – Present

Seongnam, Korea

- Research and develop LLM-powered conversational systems for search, with an emphasis on retrieval-augmented generation, query planning, response grounding, and production quality.
- Contributed to the launches of [Cue](#), [AI Briefing](#), and [Shopping Agent](#), delivering conversational and agentic AI experiences across search and commerce.
- Co-developed [Tree-of-Question](#), a structured retrieval framework for complex Korean question answering, published at the NAACL 2024 Industry Track.

Research Associate

KAIST, Users & Information Lab

Feb. 2022 – Sep. 2022

Daejeon, Korea

- Researched fairness and responsible NLP with Prof. Alice Oh, focusing on culturally and linguistically grounded offensive-language modeling.
- Led the construction of KOLD, a dataset of 40,429 Korean comments with hierarchical labels, target annotations, context, and offensive spans; released the data and baseline models publicly.

EDUCATION

Sogang University

M.S. in Computer Science and Engineering; advised by Prof. Jungyun Seo

Aug. 2019 – Aug. 2021

Seoul, Korea

Sogang University

B.A. in Chinese Culture; B.S. in Computer Science and Engineering

Feb. 2013 – Aug. 2019

Seoul, Korea

- One-year exchange at Tsinghua University, Beijing, China; two-year leave of absence for military service.

HONORS AND AWARDS

Winner, Track 4, Ninth Dialog System Technology Challenge (DSTC9)

2020

Winner of \$18,000, NAVER AI RUSH

2020

Grand Prize, NLP Competition, National Institute of Korean Language

2019

TECHNICAL SKILLS

AI / NLP

Large Language Models, Retrieval-Augmented Generation, Agentic AI, Multi-hop QA, Responsible AI

Programming

Python, C/C++

Languages

Korean (native), English (fluent; TOEFL iBT 106), Chinese (advanced; HSK Level 6)
